

# Synergy - E → Synergy Cloud

UPGRADE AVAILABLE!

## Better Access, Better Care

Synergy Cloud software allows clinicians to remotely monitor infants who are at risk for apneas, bradycardias, or desaturations—reducing the length of stay for newborns in the NICU and making home infant monitoring more profitable for home care providers.

24/7 Connection to Patient Data

Data Accuracy

Low Costs for Everyone

Training Videos & Help Desk

User-Driven Updates

Complete Security

## Your Peace of Mind is Our Mission

Accessing your patient's data is the key to providing the care they deserve. Synergy Cloud automates continuity of care from hospital to step-down to home for NICU graduates. Remove the wait-time, expense, and tedium from your infant monitoring processes.

### Easy-to-Use

- Data available through website anytime, anywhere through PC, tablet or mobile
- Familiar interface with intuitive design
- Ability to import data from existing SmartMonitor cardiorespiratory monitors

### Streamlined Communication

- Communication to care team is simplified, automated and configurable by case
- Ability to interface with hospital EMR

### Robust Analytics

- All downloads consolidated in one patient case record improving data interpretation
- Detailed reporting

### Trusted Security

- Patient PHI and personal identifiers are encrypted, secured and never e-mailed
- Hosting complies with national standard including HIPAA (US) and GDPR (EU)

See what moving to the cloud can do for you and your patients!
