

Synergy - E → Synergy Cloud

UPGRADE AVAILABLE!

Better Access, Better Care

Synergy Cloud software allows clinicians to remotely monitor infants who are at risk for apneas, bradycardias, or desaturations—reducing the length of stay for newborns in the NICU and making home infant monitoring more profitable for home care providers.

Your Peace of Mind is Our Mission

Accessing patient's data is the key to providing the care they deserve. Remove the wait-time, expense, and tedium from your infant monitoring processes by moving to the cloud. All accounts have access to the full suite of Synergy Cloud functionality.

Easy-to-Use

- Data available through website anytime, anywhere through PC, tablet or mobile
- Familiar interface with intuitive functionality and design
- Ability to import data from existing SmartMonitor cardiorespiratory monitors

Streamlined Communication

- Communication to care team is simplified, automated and configurable by case

Complete Coverage

- Continuity of care between hospital and home for NICU graduates

Robust Analytics

- Track and manage equipment by case and usage

Trusted Security

- Patient PHI and personal identifiers are encrypted, secured and never e-mailed
- Hosting complies with national standard including HIPAA (US) and GDPR (EU)
