

# Better Access, Better Care

Synergy Cloud software allows clinicians to remotely monitor infants who are at risk for apneas, bradycardias, or desaturations—reducing the length of stay for newborns in the NICU and making home infant monitoring more profitable for home care providers.

24/7 Connection to Patient Data

Data Accuracy

Low Costs for Everyone

Training Videos & Help Desk

User-Driven Updates

Complete Security

## Your Peace of Mind is Our Mission

All accounts have access to the full suite of Synergy Cloud functionality.

- Account Associations
- Interpretation and Scoring
- Profile Customization
- Care Network Collaboration
- Custom Reporting
- Account Preferences
- Care Notifications
- Online Help Resources
- Unlimited Storage

## Creating Continuity of Care

Accessing your patients data is the key to providing the care they deserve. Remove the wait-time, expense, and tedium from your infant monitoring processes. See what moving to the cloud can do for you and your patients.

### Easy-to-Use

- Data available through website anytime, anywhere through PC, tablet or mobile
- Familiar interface with intuitive functionality and design
- Ability to import data from existing SmartMonitor units
- Case consolidation
- Equipment tracking

### Streamlined Communication

- Continuity of care between hospital and home for NICU graduates
- Communication to care team is simplified, automated and configurable by case
- Ability to interface with hospital EMR
- Detailed reporting

### Trusted Security

- Patient PHI and personal identifiers are encrypted, secured and never e-mailed
- Hosting complies with national standard including HIPAA (US) and GDPR (EU)
